Notes

- **Languages are not fully parallel:** EN exposes 3 machines, IT exposes 9, FR 9. Several FR topic/supply pages (poches & paniers, tables ostréicoles, écologie) and the events have no EN/IT equivalent.
- Two IT machines have **no datasheet** available (bollitore piccolo, spogliarellista per tazze).
- The site is a static export; dynamic behaviors (mobile menu, machine-grid layout) are restored with small in-repo CSS/JS shims rather than the original LiteSpeed combined bundles, which were not exported.
